<b>Service:</b> Maintenance	<b>Subject:</b> carriageway defects	<b>Classification:</b> fault reports	<b>Enquiry Ref:</b> M23TP001119
<b>Desc.:</b> Customer Selection=Deeper than 5cm,The size of the pothole is that of a dinner plate, and it is at least 5 cm deep in a wide diameter around the bottom. I have not noticed this before, however clearly many people may have reported it due to the technical paint lines in the vicinity. This pothole seem to be marked 33.			
<b>Location:</b> INSURANCE CLAIM - Opposite bus stop which is near LC16 - Is on opposite side of carriageway heading towards Meander Mews - Very deep pothole - more so than any other in the vicinity - the general's road is of very poor quality. The issues on this part of Cowdray avenue are marked up with significant orange lines. They are not warning lines, instead they look like technical drawing line in urgency of getting these disastrous pot holes fixed.

**Enquiry No.:** 2869538      **Logged by:** CRM Connector      **on:** 24/09/2023 04:42  
**Service:** Maintenance      **Subject:** carriageway defects      **Classification:** fault reports  
**Desc.:** Westbound carriageway floods Cowdray Avenue: For years, the road has flooded badly every time there is moderate rain and remains flooded for some time after to the extent of covering an 8 foot width of the road with several inches of water.

There is a kind of perforated kerb along the southern edge of the carriageway that should provide good drainage, but appears to be blocked.

This kerb drain may (or may not) connect to the ditch running to the Colne which is adjacent to the public footpath - the ditch seems relatively clear but the outlet from the drain (?) has a lot of sediment which suggests the drain run may well be partially obstructed.

Various hearsay has it that the drains were designed in a way that does not work, but I don't think our civil engineers are incompetent so I'm assuming the drain is connected and that it runs on a downward gradient. However, if the basic maintenance is missed, then the drains could easily block. What is the problem please?

<b>Desc.:</b> Customer Selection=Deeper than 5cm,A large and arguably hazardous pothole has emerged and is enlarging as the days go by. When large vehicles hit the pothole it's causes not only my house to shake, but all the houses 3-4 along on either side. I've decided to report it now as it is becoming unbearable, waking my neighbours and I in the night as lorries strike it, and without sounded too dramatic, is an accident waiting to happen.

**Desc.:** Title=Surface around a cover,As above not sure exact spot you would have to go slow and look or walk the side walk to see it.. just concerned.  
**Location:** It's when you are near the newish houses built on left before you get to Mac      **Contact:**  
Donald's. I drove along the road and dropped down into a dip. It turns out it's a  
manhole of some sort in the actual road it looks like it's actually sinking and stating  
to lift up at an angle. If you hit that in the dark you'll be in trouble. I'm concerned it's  
a start of a possible sink hole being as the houses were built where it used to flood.

**Service:** Maintenance      **Subject:** carriageway defects      **Classification:** fault reports  
**Desc.:** Title=Cracking,Potholes, cracks and traffic calming measures for motor vehicles make this stretch of road incredibly uncomfortable, sometimes unsafe and overall wholly unsuitable for cyclists.  
Resurfacing the road would improve the situation somewhat but there would still be the issue of the traffic calming bumps (which should definitely remain in place to keep motor vehicle speeds low,  
but are unsuitable for cyclists).

In particular where the cycle path diverges from the footpath outside no. 342 to join the road is very bumpy with large cracks.

There is a wide grass verge along this stretch of the road with a very narrow footpath. It would be better to widen the path and convert it to a shared footpath/cycle lane with a dividing line, as has been done on the other stretches of Cowdray Avenue. Not only would this create a more comfortable ride for cyclists, it would reduce conflict between cyclists and cars on this stretch of road.

**Location:** The entire length of the Cowdray Avenue side road, but particularly where the cycle      **Contact:**  
lane joins the side road outside no. 342.

**Desc.:** Title=Around 4cm deep,After receiving your reply to my issue, I am not happy. It is not my concern or problem that specific pothole was not as serious as other issues. The issue was that due to you allowing a pothole to grow, it cost me a day off of work, I sat in my car for 2 hours and 40 minutes and I had to replace a blown tyre. This cost me in total (£125). I have been informed by an MP that the pothole that I hit was reported previous to my incident happening and therefore I want to take this further rather than everyone's complaints just being fobbed off. Thank you. Please can you respond on an email that I can reply to rather than an email address that is not checked upon for mail.  
**Location:** In reference to my last email reply that you dodged by saying that I couldn't reply to the email that you emailed me from. Giving me option other than sending it though here. REF NO: 2752943      **Contact:**

**Desc.:** Title=Deeper than 5cm, large pot hole in the centre of the 2 lanes going towards the Albert put and premier inn hotel.  
  
I was swapping lanes, while following a lorry, as i done this i hit the hole which made an awful bang sound. this caused my tyre (which ive only had a full new set for around 2months) to pop as shown in the picture this caused a hole in my tyre. I have today had to have a new tyre put on.  
This had incurred fees for a new tyre (I have the invoice but unfortunately it wont let me attach to this email. costing £61.16) and fitting costs.  
**Location:** in between 2 lanes A133 heading towards colne bank avenue Colchester on cowdray avenue, before you get to the hotel on the right side of the road.      **Contact:**
